

# Condensate drain WA-2

Part number: 152810

FESTO

## Data sheet

| Feature                     | Value                              |
|-----------------------------|------------------------------------|
| Actuation type              | Mechanical                         |
| Mounting position           | Vertical $\pm 5^\circ$             |
| Manual override             | Non-detenting                      |
| Condensate drain            | Fully automatic                    |
| Structural design           | Fully automatic external mechanics |
| Measured variable           | Fill level                         |
| Valve function              | 2/2-way, monostable, open          |
| Operating pressure          | 1.5 bar...14 bar                   |
| Operating medium            | Water                              |
| LABS (PWIS) conformity      | VDMA24364 Zone III                 |
| Storage temperature         | -20 °C...60 °C                     |
| Temperature of medium       | 0 °C...50 °C                       |
| Ambient temperature         | 0 °C...50 °C                       |
| Product weight              | 92 g                               |
| Type of mounting            | In-line installation               |
| Condensate drain connection | PK-4                               |
| Pneumatic connection        | M9                                 |
| Housing material            | Wrought aluminum alloy             |
